

BNI Empower — Apps Script Update Briefing

I am sharing an updated version of our Google Apps Script (`appsscript.js`). Please read the full file and treat it as the current source of truth going forward. Below is a summary of what was added in this update so you are fully up to speed.

What Already Existed (Unchanged)

The script was already handling:

- **Weekly check-in web app** — members submit attendance via a deployed web app (`doGet` / `doPost`)
 - **Weekly_Submissions sheet** — stores each member's attendance status, sub details, and visitor info
 - **Sunday 8pm missing-submissions email** — sent to VP (Wee Khai) and cc'd to President (Iskons) listing members who have not submitted
 - **Actual_Attendance sheet** — records sign-in status on meeting day
 - **Birthday reminders** — end-of-month list email + day-of email to MC team
 - **Core_Value_Sharing column management** — adds a new meeting column with presenter
 - **BNI Empower Sheets menu** — admin shortcuts (check missing, clear submissions, check attendance)
-

What Was Added — Slide Automation Module

A new self-contained module was appended to the script. It reads the `Weekly_Submissions` sheet and automatically updates the BNI Empower Google Slides presentation every Sunday night.

Presentation ID: `14C1-Q5SuH7MeUtPWHdPQaezR8sICNISPmm20XAcJF24`

Business Rules

Rule	Detail
Leadership Team slides	Never modified — President, VP, Sec-Treas always shown regardless of attendance

Support Team slide (Slide 15)	Absent members (even if they have a sub) are hidden and remaining members are auto-rearranged into a clean grid
Event Coordinator slot	Currently vacant — kept as-is until a member is assigned
30-sec intro slides	Absent with no sub → slide moved to end of intro section; Absent with sub → slide stays (sub presents); Present → no change

Grid Rearrangement Logic (Slide 15)

When members are hidden from the Support Team slide, the remaining profiles are repositioned automatically:

- **≤ 4 profiles** → single centred row, evenly spaced
- **> 4 profiles** → two rows; top row gets `ceil(n/2)` profiles

Support Team Members on Slide 15

The original 5-member layout is:

- **Row 1 (top):** Kevin Phua | Iskons | Benjamin Ng
- **Row 2 (bottom):** Zefirelli Noordin (alias: Zef) | Zhao ShuHui

Each member has hardcoded Google Slides element IDs (objectId) for both their profile photo (image) and name/role text box (shape), along with their original transform values (position, scale) for accurate restoration.

Hide Method

The Google Slides API does not support image transparency. The workaround used:

- **Images** → moved off-screen (translateX/Y set to 99,000,000 EMU)
- **Text boxes** → text colour set to white (invisible on white background)

Restoration reverses both operations using the stored original transform values.

Name Aliases Handled

The script normalises all of the following to their canonical keys:

- Zef → Zefirelli Noordin
- Wee Khai / Pang Wee Khai → Wee Khai Pang

- ShuHui / ShuHui Zhao / Zhao ShuHui → Zhao ShuHui

New Functions Added

Function	Purpose
<code>updateSlidesFromAttendance()</code>	Main entry point — reads sheet, updates Slide 15, moves intro slides
<code>updateSupportTeamSlide_(absentSet)</code>	Hides absent members and rearranges grid on Slide 15
<code>updateIntroSlides_(trulyAbsentSet)</code>	Moves absent (no-sub) members' 30-sec intro slides to end
<code>restoreAllSlides()</code>	Resets all 5 Support Team members to original positions
<code>weeklySundayTrigger()</code>	Master Sunday 9pm trigger: restore → update
<code>computeGrid_(n)</code>	Computes (row, cx) grid positions for n visible profiles
<code>computeColumnCentres_(n)</code>	Evenly spaces n columns across the usable slide width
<code>getWeeklyAttendance_()</code>	Reads Weekly_Submissions sheet and returns attendance map

Trigger Setup

A time-based trigger is set on `weeklySundayTrigger` — runs every **Sunday 9pm** (after the 8pm submission deadline). It:

1. Calls `restoreAllSlides()` — clean slate
2. Calls `updateSlidesFromAttendance()` — applies this week's attendance

New Menu Items (BNI Empower menu in Sheets)

- **"Update Slides from Attendance"** → `updateSlidesFromAttendance()` — run manually anytime
- **"Restore All Slides (full reset)"** → `restoreAllSlides()` — resets Slide 15 to original

Data Sources

Data	Location
Member roster	Active_Members sheet, cols C (First Name) + D (Surname)
Weekly attendance	Weekly_Submissions sheet — col C (Member Name), col D (Attending yes/no), col F (Sub Name)
Role assignments	LT / ST sheet in the same spreadsheet
Member photos	Google Drive folder: Empower Chapter Members Photos (folder ID: 1Cb2JJpoTOzpBbXJqBRIFzHSVE6Ot_0Ib)

Known Gaps (To Be Addressed Later)

- **TYFCB slide** — to be updated separately (data provided manually)
- **Notable Networker slide** — to be updated separately (data provided manually)
- **Closing quote slide** — to be updated separately
- **Missing member photos** — Junxian Zhang and Rajivgandhi Ponnusamy photos not yet uploaded to Drive

Please keep all of the above context in mind when I ask you to make further changes to this script.
